

BALAKRISHNAN M

SENIOR SOFTWARE ENGINEER

linkedin.com/in/balakrishnan-m-534149116/

PROFILE

Results-driven Full-Stack Software Engineer with 8+ years of experience designing, developing, and deploying robust web applications, RESTful APIs, and scalable backend architectures. Proficient across the entire software development lifecycle, specializing in PHP (Laravel, CodeIgniter), modern JavaScript (React, Next.js, Node.js), and database optimization. Experienced in integrating intelligent AI workflows (LLM APIs, prompt engineering) and implementing end-to-end automation testing with Playwright to ensure high code quality, system resilience, and continuous delivery across enterprise platforms.

EDUCATION

2013 - 2016

B.Sc., Information Technology

Graduated with 73.5% marks

JP College of Arts & Science, Tenkasi.
(Manonmaniam Sundaranar University)

TECHNICAL SKILLS

- PHP, JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
- Laravel, CodeIgniter, React.js, Next.js, Node.js, Angular, Flutter, jQuery, Tailwind CSS, Bootstrap
- Playwright (End-to-End & Cross-Browser Automation), Automated Regression Suites, Postman API Testing
- LLM API Integration (Gemini, Claude, OpenAI), Prompt Engineering, Automated Data Extraction, OCR Pipelines
- MySQL, MongoDB, Firebase (Firestore/ Realtime Database), PostgreSQL
- RESTful API Architecture, JSON/XML parsing, Webhooks
- Git, GitHub, TCPDF, Payment Gateways (PayPal, Stripe), WooCommerce, WordPress

WORK EXPERIENCE

Software Engineer

Mar 2019 - Oct 2026

Vanilla Networks Pvt Ltd, Technopark, Trivandrum

- Architected and maintained enterprise-grade web applications and high-throughput RESTful API services utilizing Laravel and CodeIgniter frameworks.
- Engineered the backend and user workflows for Summit CPR, an online certification platform; integrated secure PayPal payment gateways, automated student enrollments, and customized PDF certificate issuance.
- Developed When Would Work, an event scheduling platform, implementing real-time consensus voting algorithms and dynamic calendar polling using CodeIgniter, JavaScript, and AJAX.
- Integrated AI-powered workflows and LLM APIs to automate document processing, smart data extraction, and internal business logic pipelines.
- Optimized database indexing, query execution plans, and API payloads to reduce latency, while leading structured code reviews, automated unit testing, and bug remediation.

Web Developer

Nov 2016 - Mar 2019

WebGlobal Technology Pvt Ltd, Trivandrum

- Designed and maintained automated end-to-end test suites using Playwright, running cross-browser regression suites to detect UI and functional defects before deployment.
- Developed EPIC, an automated construction cost estimation engine; integrated OCR tools and TCPDF libraries to scan architectural PDF blueprints, extract material counts, and compute instant estimates.
- Engineered responsive front-end user interfaces and core backend logic using modern PHP, HTML5, CSS3, JavaScript, and jQuery.
- Deployed and customized Kerala Special, an e-commerce platform built on WordPress and WooCommerce, configuring secure payment gateways, inventory tracking, and checkout workflows.
- Built automated reporting modules capable of exporting dynamic Excel spreadsheets, PDF invoices, and calendar schedules, while integrating bi-directional JSON/XML APIs with third-party web services.
